Summary

AI Developer with 3 months of hands-on experience developing AI applications using Python, FastAPI, Streamlit, and LangChain. Skilled in Generative AI, Prompt Engineering, LLMs, NLP, Machine Learning fundamentals, REST APIs, SQL, and data visualization. Developed AI agents, document Q&A systems, resume parsing solutions, and analytics dashboards.

Technical Skills

Programming Languages: Python, Java
AI and Machine Learning: Generative AI, Large Language Models, Prompt Engineering, LLM Evaluation, NLP, Machine Learning, Hallucination Detection
Frameworks and Libraries: FastAPI, Streamlit, LangChain, Pandas, NumPy, Matplotlib, Plotly
Databases: MySQL, SQL
Tools and Platforms: GitHub, VS Code, PyCharm, Jupyter Notebook, ChatGPT, Gemini, Perplexity.
Core Concepts: REST APIs, Data Analysis, Data Visualization, RAG, Semantic Search, AI Agents

Professional Experience

QA Engineer Intern **December 2025 – March 2026**
Trinity Mobile Pvt. Ltd., Noida

- Built AI-powered applications and intelligent dashboards using FastAPI, Streamlit, and LangChain.
- Enhanced LLM solutions with AI Data Analyst, Resume Analyzer, and Evaluation Dashboard.
- Created AI workflows for data processing, insight generation, and natural language-based interactions.
- Integrated REST APIs and AI modules to enhance application scalability and performance.
- Applied prompt engineering and LLM evaluation to improve response quality and reduce hallucinations.

Projects

Agentic Document Q&A System *Python, LangChain, RAG, NLP, Semantic Search*

- Built a document Q&A system that allows users to upload files and receive context-aware answers.
- Developed a RAG pipeline for context-aware retrieval and accurate AI-generated responses.
- Integrated semantic search, NLP and AI agents to enhance document intelligence and response accuracy.

AI Data Analyst Agent *Python, FastAPI, Streamlit, LangChain, Plotly*

- Built an AI-powered data analyst agent for dataset processing, automated insights and visualization.
- Created natural language querying to analyze datasets and generate charts, summaries and reports.
- Designed interactive dashboards and backend systems for efficient data exploration and decision-making.

AI Resume Parser and Analyzer *Python, Streamlit, NLP, Machine Learning, SQL*

- Engineered a resume parser using Python, Streamlit, NLP, Machine Learning, and SQL.
- Applied resume classification, skill extraction, ATS-based analysis, and recommendation generation.
- Designed AI dashboards for resume screening, skill analysis, and recommendations.

Education

Master of Computer Applications, Computer Science **2025**
Institute of Management Studies, Noida CGPA: 7.8/10

Bachelor of Science, Mathematics Honours **2023**
Shaheed Nandkumar Patel Vishwavidyalaya, Raigarh Marks: 1312/1800

Certifications

- DigiSaksham Python Fundamentals Coursework
- Data Science Certificate from Reliance Foundation
