Summary

Python Full Stack Developer with 6 months of experience building web solutions using Python, FastAPI, PHP, React.js, JavaScript, PostgreSQL, and MySQL. Experienced in REST APIs, JWT authentication, database design, and frontend-backend integration. Skilled in Git, Docker, Agile practices, and AI-driven applications with LangChain.

Work Experience

Denama Enterprise Pvt.Ltd. Dec 2025 - June 2026

Software Developer Intern

- Developed and maintained full-stack web applications using Python (FastAPI), PHP, React.js, PostgreSQL, and MySQL, contributing to multiple application modules and feature enhancements.
- Planned and applied RESTful APIs with authentication, request validation, exception handling, and Swagger documentation, improving API reliability and developer usability.
- Managed database schemas, CRUD operations, and query optimization for PostgreSQL and MySQL databases to support scalable application performance.
- Collaborated with development teams using Git-based workflows for version control, debugging, code reviews, and deployment activities.
- Resolved application issues, improved existing features, and optimized backend logic by following clean code practices and maintaining application quality.

Projects

HireSense AI — *Tech Stack: Python, FastAPI, React.js, PostgreSQL, Redis, Docker, JWT*

- Developed an AI-powered interview platform with LLM-based question generation and resume analysis.
- Implemented JWT authentication and RBAC for secure user management.
- Integrated Redis for caching and rate limiting to improve application performance and scalability.
- Built RESTful APIs and containerized the application using Docker for streamlined deployment.
- Designed a modular full-stack architecture for seamless frontend-backend communication.

Denama Healthcare — *Backend Development*

- Executed JWT-based authentication with Signup, Login, and Logout functionality using FastAPI.
- Designed PostgreSQL models using ORM for efficient data management and application management.
- Enforced database migration workflows to handle schema updates and maintain data consistency.
- Created RESTful APIs with request validation, error handling, and Swagger documentation.

Skills

Languages	Python, JavaScript, SQL
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend	FastAPI, REST APIs, JWT Authentication, Pydantic, API Developement, OOPS
Databases	PostgreSQL, MySQL, Redis, Query Optimization, Indexing
Tools & DevOps	Git, GitHub, Docker, Docker Compose, Postman, CI/CD, GitHub Actions
AI/GenAI	LangChain, RAG, ChromaDB, LLMs, Generative AI, LLM APIs, AI Agents

Education

Beacon Institute of Technology Meerut

Bachelor Of Computer Application *2022 - 2025*

T.R.M Public School Modinagar

Class XII *2021 - 2022*
